

# Perfumes that spell style

*Following the best perfumery traditions, Lobogal's fragrances are classical, with a modern touch*

## NACEO

The luxurious aroma of the Naceo collection evokes the world of power and triumph. Four refined and masculine fragrances are a true celebration of those great moments shared by men of different generations.

### NACEO VERT

The fragrance meets you with the invigorating top accords full of the sparkling freshness of citrus. The spices blended with vetiver and green leaves in the middle note create a strong universe, rounded

off by an exquisite end note of amber and musk.

### NACEO ROUGE

Full-bodied like an aged wine and passionate like a kiss, the fragrance possesses a blend of oriental freshness of bergamot and citrus with a trace of spice, interwoven with the sensuality of jasmine and the nobility of an exotic wood.

### NACEO NOIR

The fragrance opens with the intensity of cinnamon and nutmeg, bergamot and coriander. The

aromatic heart note harmonises with the classicism of sandalwood and the elegance of vetiver. The balsamic end note hinges on an accord of amber, vanilla and myrrh.

### NACEO BLEU

Transparent, green and woody in nature, the fragrance represents a combination of fresh citrus notes interwoven with the exoticism of pineapple. At the heart of the fragrance, the essence of jasmine is emphasised by the intensity of basil and crowned by the elegance of cedar, sandalwood and musk.

## LOBOGAL GOLD

*A new, bright and elegant perfume, the gold and yellow colours of the flacon let you know that it is brimming with style and luxury. The shapely bottle shape reminds one of a stylish ball gown. This optimistic, vibrant and utterly feminine perfume has a strong and attractive personality, just like a woman you cannot take your eyes off. Absolutely stunning, she radiates charm and has her own unique style.*

*This perfume carries you away with the fresh purity of a mouth-watering shower of fruits and then dazzles you by waves of sensuality of a flower bouquet. The femininity of this fragrance intensifies at the end with leather and powdery notes, almost transforming the aroma into an accessory, that a woman would always keep with her as a fine concentrate of luxury and sophistication.*

## LOBOGAL POUR LUI

A new, authentic and masculine fragrance, it is dressed in a chrome-covered glass bottle, created by a combination of extremes — classical and modern, yet absolutely timeless. Its structure and powerful shape evokes feelings of certitude and individualism, taking you away into the world of technology. Created by an amazing fusion of time, the perfume possesses an exotic bouquet of spices from the past, bringing to memory the flavour of the herbal liqueurs, which monks produced for centuries behind the walls of their monasteries. The extract of whisky and the way it is used in the olfactory composition adds a true revolutionary spirit, emphasising both its classical and extravagant nature.

## LOBOGAL POUR ELLE

An absolute classicism with modern character, a symbol of femininity and timeless elegance — that's Lobogal Pour Elle. It's the fragrance of a classical woman of the future — she is sophisticated, self-confident and independent. The elegant bottle is made of a combination of classical gold and modern laser technologies, creating an amazing fusion of time. Though it follows the best perfumery traditions, the aroma will at the same time take you away into the world of futuristic technology. The freshness of citrus and sweetness of fruits contrasts with plenty of blooming flowers. Nuances of spices and woody notes give the aroma piquancy and an almost tangible feminine sensuality.
